

MATERIAL SAFETY DATA SHEET

ALOE VERA SPRAY DRIED 200:1 – CONVENTIONAL

PRODUCT CODE SC200X
 ISSUE DATE: 01/01/2025 REVISION DATE: 01/03/2025

In accordance with Regulation (EC) No 1907/2006 (REACH), Art. 31 and subsequent updates

SECTION 1: Identification of the substance/mixture and of the company/undertaking

Trade Name	Aloe Vera Spray Dried 200:1 – Conventional
Synonyms	Conventional Aloe Vera Spray Dried 200X
EC Number	-
CAS Number	94349-62-9
REACH Registration Number	-
Relevant Identified Uses	Ingredients for food, cosmetics, and nutraceuticals
Uses Advised Against	-
Manufacturer/Supplier	Sinaloina SA de CV
Address	Real de Zimapán 430 Villas del Parque Querétaro Querétaro 76140
Phone	-
Email	info@sinaloina.com
Emergency Number	1-800-424-9300

SECTION 2: Hazards identification

Classification of the Substance or Mixture	No information. The mixture does not contain substances presenting a health or environmental hazard within the meaning of Regulation (EC) No 1272/2008. <i>For the full text of Hazard- and EU Hazard statements, see SECTION 16.</i>
Hazard Pictograms	No information. The mixture does not contain substances presenting a health or environmental hazard within the meaning of Regulation (EC) No 1272/2008.
Signal Word	No information. The mixture does not contain substances presenting a health or environmental hazard within the meaning of Regulation (EC) No 1272/2008.
Precautionary Statements	No information. The mixture does not contain substances presenting a health or environmental hazard within the meaning of Regulation (EC) No 1272/2008. However, general precautionary measures are recommended: P261 – Avoid breathing dust, fumes, gas, mist, vapors, or aerosols. P314 – If feeling unwell, seek medical advice.
Adverse Physicochemical Effects	Information not available.

Adverse Human Health Effects and Symptoms

Information not available. When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). Any other hazard information applies to inadvertent misuse or accidents.

Adverse Environmental Effects

Information is not available. When used properly, the product is safe and tolerable in accordance with the legal provisions (Article 3 of the EC Cosmetics Regulation). Any other hazard information applies to inadvertent misuse or accidents.

Other Adverse Hazards

Based on the available data, the product does not contain PBT or vPvB substances in concentrations \geq 0.1%.

Based on the available data, no substances have been identified as endocrine disruptors in accordance with Regulation (EU) 2017/2100 and Regulation (EU) 2018/605.

SECTION 3: Composition and information on ingredients

The product does not contain substances classified as hazardous to health or the environment under the provisions of Regulation (EU) 1272/2008 (CLP) (and subsequent amendments and adaptations) in quantities that would require declaration.

SECTION 4: First Aid Measures

General Notes

When contact with the product, use or handling, causes symptoms requiring prompt aid, follow the directives below for the specific exposure route.

Following Inhalation

In case of inhalation, the affected person should be moved into fresh air and kept still. If breathing is difficult, consult a doctor.

Following Skin Contact

Remove contaminated, saturated clothing immediately. Wash thoroughly the body (shower or bath). When in doubt or if symptoms are observed, get medical advice.

Following Eye Contact

Remove contact lenses. After contact with the eyes, rinse with water with the eyelids open for a sufficient length of time, then consult an ophthalmologist immediately.

Following Ingestion

If accidentally swallowed rinse the mouth with plenty of water (only if the person is conscious) and obtain immediate medical attention. Do not induce vomiting when the affected person is unconscious.

Self-Protection of the First Aider

No particular information.

SINALOINA SA DE CV

INFO@SINALOINA.COM

WWW.SINALOINA.COM

Symptoms	See Section 11 (Toxicological information)
Effects	See Section 11 (Toxicological information)
Notes for the Doctor	Information is not available.
Special Treatment	Information is not available.

SECTION 5: Firefighting Measures

Suitable Extinguishing Media	Carbon dioxide, foam, powder, water mist.
Unsuitable Extinguishing Media	No particular media.
Hazardous Combustion Products	However, avoid breathing combustion products.
Advice for Firefighters	Cool containers with water to avoid possible decomposition of the product and formation of potential hazardous substances. Wear full protection equipment available. When possible, collect extinguishing water and avoid contamination of surface water or drains.
Equipment for Firefighters	Standard firefighting gear, such as a self-contained open circuit compressed air breathing apparatus (EN 137), flame-resistant suit (EN 469), flame-resistant gloves (EN 659), and firefighter boots (HO A29 or A30).

SECTION 6: Accidental Release Measures

For non-emergency personnel	Wear suitable protection equipment (see also Section 8 of the SDS) to avoid inhalation, contact with the skin and eyes and contamination of clothes.
For Emergency Responders	Wear suitable protection equipment (see also Section 8 of the SDS) to avoid inhalation, contact with the skin and eyes and contamination of clothes.
Environmental Precautions	Do not allow them to enter surface water or drains.
For Containment	Collect products with mechanical devices (if product is flammable use only antistatically equipped spark-free tools) and store in suitable containers for disposal. Check compatibility of the containers to collect product (see also Section 10 of the SDS).
For Cleaning Up	Use inert absorbent material (sand, vermiculite, diatomaceous earth, etc.) to soak up leaked product. Collect most of the remaining material and store it in

SINALOINA SA DE CV

QUERÉTARO, QUERÉTARO 76140

INFO@SINALOINA.COM

WWW.SINALOINA.COM

suitable containers for disposal. Make sure the leakage site is well aired. Contaminated material should be disposed of in compliance with the provisions of Section 13.

Other Information

No particular information

Reference to other sections

Safe handling: see section 7

Disposal: see section 13

Personal protection equipment: see section 8

SECTION 7: Handling and Storage

General protective measures

Handle products after consultation of all other sections of this SDS. Avoid product dispersion. When using it do not eat, drink, smoke, or sniff. Avoid improper contact with skin and eyes and inhalation. If the product is flammable provide adequate earthing of containers, equipment, pumps and ventilation facilities.

Measures To Prevent Fire

Measures To Prevent Aerosol and Dust Generation

No particular information

Measures To Protect the Environment

Avoid product dispersion, keep containers well closed.

Advice On General Occupational Hygiene

When using it, do not eat, drink, smoke, or sniff. Remove clothes when contaminated. Wash hands before breaks and after work.

Technical Measures and Storage Conditions

Store in a fresh place, not under direct sunlight and, if product is flammable, keep away from fire and sources of ignition.

Packaging Materials

Store in original containers; replace the closing cap. If the product is moved to other containers, label them the same way as the original packages.

Requirements For Storage Rooms and Vessels

Store in a well aired and fresh place. If the product is flammable, keep away from fire and sources of ignition. If incompatible materials are listed in Section 10 of this SDS, keep them far from this product.

Recommendations

No particular information

Industrial Sector Specific Solutions

No particular information

SECTION 8: Exposure Controls/Personal Protection

Exposure Control

Since the use of appropriate technical measures should always take priority over personal protective equipment, ensure good workplace ventilation through effective local exhaust.

Biological limit values

Information not available

Exposure limits at intended use

Information not available

DNEL/PNEC-values

Information not available

Risk management measures according to used control banding approach

It is recommended to use a P-type filtering face mask, with the class (1, 2, or 3) and actual necessity to be determined based on the results of the risk assessment (ref. EN 149 standard).

Environmental Exposure Controls

Emissions from production processes, including those from ventilation equipment, should be controlled to ensure compliance with environmental protection regulations.

Hand protection

Protect hands with Category III work gloves (ref. EN 374 standard). When selecting the final glove material, consider compatibility, degradation, breakthrough time, and permeation. In the case of preparations, the resistance of work gloves to chemical agents must be tested before use, as is not always predictable. Gloves have a wear time that depends on duration and usage conditions.

Skin protection

Wear long-sleeved work clothing and Category I professional safety footwear (ref. Regulation 2016/425 and EN ISO 20344 standard). Wash with water and soap after removing protective clothing.

Eye protection

It is recommended to wear sealed protective goggles (ref. EN 166 standard).

Respiratory protection

If the threshold limit value (e.g., TLV-TWA) of the substance or any of the substances in the product is exceeded, it is recommended to wear a mask with a type A filter, with the class (1, 2, or 3) chosen according to the usage concentration limit (ref. EN 14387 standard). If gases or vapors of different nature and/or gases or vapors with particles (aerosols, fumes, mists, etc.) are present, combined filters should be used. The use of respiratory protective equipment is necessary if the technical measures adopted are not sufficient to limit worker exposure to the considered threshold values. The protection provided by masks is still limited. If the substance is odorless or its odor threshold is higher than its TLV-TWA and in case of emergency, wear a self-contained open-circuit compressed air breathing apparatus (ref. EN 137 standard) or an external air supply respirator (ref. EN 138 standard). For the correct selection of respiratory protective equipment, refer to the EN 529 standard.

SECTION 9: Physical and Chemical Properties

Appearance	Fine powder
Odor	Characteristics of Aloe Vera
pH	4.5 – 5.5
Aloin (A Y B)	< 0.5 ppm
Melting point/freezing point	Not available
Initial boiling point	Not available
Boiling range	Not available
Flash point	Not available
Evaporation rate	Not available
Flammability (solid, gas)	Not available
Upper flammability	Not available
Lower flammability	Not available
Upper explosivity	Not available
Lower explosivity	Not available
Vapor pressure	Not available
Vapor density	Not available
Relative density	Not available
Solubility	Soluble in water/Insoluble in Organic solvents
Partition coefficient	Not available
Auto-ignition temperature	Not available
Decomposition temperature	Not available
Viscosity	Not available
Explosive properties	Not available
Oxidizing properties	Not available

*Once reconstituted to in a 1X

SECTION 10: Stability and Reactivity

Reactivity	No reaction hazards with other chemicals at normal use and storage conditions.
Chemical Stability	The product is stable under normal use and storage conditions.
Possibility Of Hazardous Reactions	The powders are potentially explosive when mixed with air.
Conditions To Avoid	No measures: follow however the basic measures for chemical products.
Incompatible Materials	Information not available
Hazardous Decomposition Products	Information not available

SECTION 11: Toxicological Information

Acute toxicity	Not classified.
Skin corrosion/irritation	Does not meet the classification criteria for this hazard class.

Serious eye damage/irritation	Does not meet the classification criteria for this hazard class.
Respiratory or skin sensitization	Does not meet the classification criteria for this hazard class.
Germ cell mutagenicity	Does not meet the classification criteria for this hazard class.
Carcinogenicity	Does not meet the classification criteria for this hazard class.
Reproductive toxicity	Does not meet the classification criteria for this hazard class.
Summary of evaluation of the CMR properties	Does not meet the classification criteria for this hazard class.
STOT-single exposure	Does not meet the classification criteria for this hazard class.
STOT-repeated exposure	Does not meet the classification criteria for this hazard class.
Aspiration hazard	Does not meet the classification criteria for this hazard class.
Endocrine disrupting properties	Does not meet the classification criteria for this hazard class.
Other information	Based on the available data, the product does not contain substances listed in the main European lists of potential or suspected endocrine disruptors with effects on human health under evaluation.

SECTION 12: Ecological Information

Use products following good working practice. Take measures to prevent the release of the substance or mixture to the environment, such as avoiding spills or keeping away from drains.

Acute (short-term) toxicity	Information not available
Chronic (long-term) toxicity	Information not available
Abiotic degradation	Information not available
Physical- and photo-chemical elimination	Information not available
Biodegradation	Information not available
Partition coefficient n-octanol/water	Information not available
Bioconcentration factor (BCF)	Information not available
Known or predicted distribution to environmental compartments	Information not available
Surface tension	Information not available
Adsorption/Desorption	Information not available

INFO@SINALOINA.COM

WWW.SINALOINA.COM

Results of PBT and VPVB Assessment

Based on the available data, the product does not contain PBT or vPvB substances in a percentage $\geq 0.1\%$.

Endocrine Disrupting Properties

Based on the available data, the product does not contain substances identified as endocrine disruptors in accordance with Regulation (EU) 2017/2100 and Regulation (EU) 2018/605 in concentrations $\geq 0.1\%$.

Other Adverse Effects

Information not available

SECTION 13: Disposal Considerations

Product/Packaging disposal

Reuse when possible; neat cosmetic products residues are generally considered special non-hazardous waste. Disposal must be carried out by an authorized waste management company, in compliance with current national and local regulations. Contaminated packages must be delivered for reuse or disposal by an authorized waste management company.

Waste treatment-relevant information

Waste treatment must be generally performed by an authorized waste management company, in compliance with current national and local regulations.

Sewage disposal-relevant information

Waste treatment must be generally performed by an authorized waste management company, in compliance with current national and local regulations.

Other disposal recommendations

No particular information

SECTION 14: Transport Information

This section of the safety data sheet shall provide basic classification information for the transport/shipment of substances or mixtures mentioned in Section 1 by road, rail, sea, inland waterways or air. Where such information is not available or relevant this shall be stated. Where relevant, this section shall provide information on the transport classification for each of the following international agreements which are transposing the UN Model Regulations for specific transport modes: the Agreement concerning the International Carriage of Dangerous Goods by Road (ADR), the Regulations concerning the International Carriage of Dangerous Goods by Rail (RID) and the European Agreement concerning the International Carriage of Dangerous Goods by Inland Waterways (ADN), all three of which have been implemented by Directive 2008/68/EC of the European Parliament and of the Council, as well as the International Maritime Dangerous Goods (IMDG) Code for the transport of packaged goods and the relevant IMO codes for the transport of bulk cargo by sea, and the Technical Instructions for the Safe Transport of Dangerous Goods by Air (ICAO).

	US DOT	ADR	IMDG	ICAO
UN number or ID number	Not regulated	Not regulated	Not regulated	Not regulated
UN proper shipping name	Not regulated	Not regulated	Not regulated	Not regulated
Transport hazard class	Not regulated	Not regulated	Not regulated	Not regulated
Packing group	Not regulated	Not regulated	Not regulated	Not regulated
Environmental hazards	Not regulated	Not regulated	Not regulated	Not regulated
Special Precautions for Users	Not regulated	Not regulated	Not regulated	Not regulated
Maritime Transport in Bulk	Not regulated	Not regulated	Not regulated	Not regulated

SECTION 15: Regulatory Information

Complies with Regulation (EU) 2015/830 and Regulation (EC) No 1272/2008 (CLP).

SECTION 16: Other Information

Prepared by: SINALOINA

Date of Printing: 1 March 2025

ABBREVIATIONS AND ACRONYMS:

- ADR: European Agreement concerning the International Carriage of Dangerous Goods by Road
- CAS Number: Chemical Abstract Service Number
- EC Number: The identification number in the EC Inventory of Chemicals
- CLP: EC Regulation 2008/1272
- DNEL: Derived No Effect Level
- EmS: Emergency Schedule
- GHS: Global Harmonised System for the classification and labelling of chemical products
- IATA DGR: Dangerous Goods Regulations for the transport of dangerous goods by the International Air Transport Association
